Contents of Volume 236

Vol. 236 Nos. 1–2 **September 10 2000**

Research papers

Chemical evolution of coal mine drainage in a non-acid producing environment, Wasatch Plateau, Utah, USA
A.L. Mayo, E.C. Petersen and C. Kravits 1

A multidisciplinary fractured rock characterization study at Raymond field site, Raymond, CA
K. Karasaki, B. Freifeld, A. Cohen, K. Grossenbacher, P. Cook and D. Vasco 17

Impacts of input parameter spatial aggregation on an agricultural nonpoint source pollution model
T.W. FitzHugh and D.S. Mackay 35

A simple raster-based model for flood inundation simulation
P.D. Bates and A.P.J. De Roo 54

Evaluating field measured soil hydraulic properties in water transport simulations using the RZWQM
M.R. Cameira, L. Ahuja, R.M. Fernando and L.S. Pereira 78

Estimating formation properties from early-time oscillatory water levels in a pumped well
A.M. Shapiro and D.S. Oki 91

Tree sap flow and stand transpiration of two *Acacia mangium* plantations in Sabah, Borneo
E. Cienciala, J. Kučera and A. Malmer 109

Estimating evaporation in seasonally snow-covered catchments in the Sierra Nevada, California
A. Leydecker and J.M. Melack 121

Vol. 236 Nos. 3–4 **September 30 2000**

Research papers

Relations between triazine flux, catchment topography and distance between maize fields and the drainage network
F. Colin, C. Puech and G. de Marsily 139

Forecasting daily urban water demand: a case study of Melbourne
S.L. Zhou, T.A. McMahon, A. Walton and J. Lewis 153

Groundwater flow system inferred from hydraulic stresses and heads at an underground LPG storage cavern site
T. Kim, K.-K. Lee, K.S. Ko and H.W. Chang 165

Methodology and application of combined watershed and ground-water models in Kansas
M. Sophocleous and S.P. Perkins 185

Concentrations and characteristics of organic carbon in surface water in Arizona: influence of urbanization
P. Westerhoff and D. Anning 202

Development and application of a comprehensive simulation model to evaluate impacts of watershed structures and irrigation water use on streamflow and groundwater: the case of Wet Walnut Creek Watershed, Kansas, USA
S.R. Ramireddygari, M.A. Sophocleous, J.K. Koelliker, S.P. Perkins and R.S. Govindaraju 223

Derivation of a two-term infiltration equation from the Green–Ampt model
D. Swartzendruber 247

Technical note

Application of TDR to water level measurement
A. Thomsen, B. Hansen and K. Schelde 252

Contents of Volume 236 259
